Jest & Cypress (E2E & Unit Testing)

🗨 LANGUAGES

Portuguese, English

🎓 EDUCATION

Web Development

@Citeforma

2014 – 2015 | Lisbon, Portugal

📄 PROFESSIONAL EXPERIENCE

Frontend Developer

@TeaPayment

Jun 2020 – present | Lisbon, Portugal

Contributed to the development of an investment platform (**ibanwallet.com**) utilizing ReactJS, TypeScript and Redux. My role in this high-traffic platform included adding new features (investment flows & user authentication), as well as rewriting legacy code and implementing Unit Tests utilizing Jest, and E2E tests with Cypress.

Alongside this platform, participated in the development of a backoffice portal to manage the users, which was heavily integrated with the database developed by our backend team.

Through my work on both projects, I gained experience consuming APIs to display and edit data.

Took the lead on the creation of a landing page (**safebrok.com**) for other products introduced by the company. This website, while primarily static, was also powered by a CMS for its' blog section. I designed data models for the CMS' API, as well as consuming and displaying the information on the website. To deliver the project, I also created an automated CI/CD pipeline using Github Actions and AWS.

Senior Treatment Coordinator

@Straight Teeth Direct

Jun 2019 – May 2020 | Lisbon, Portugal

- First point of contact for the platform's user.
- Triage technical issues within the application to the respective Product Owner.
- Assist with training and integration of new team members.

Customer Support Specialist

@Monese

Apr 2018 – May 2019 | Lisbon, Portugal

- Assist user queries through various channel.
- Implement customer support team's internal database of training material.
- Attend daily standup meetings with the development team for upcoming platform updates and relay the information to the customer support team.
